## METHOD

1. For the crumb base: mix the ingredients together well and press firmly into a greased cake tin.
2. For the filling: cut the strawberries into quarters and set aside. Bring the orange juice, lemon juice, corn starch and sugar to a boil. Remove from the heat and add the vanilla extract and strawberries. Allow the mixture to cool.
3. Whip the cream cheese until smooth, add the chilled QimiQ Whip, QimiQ Classic and sugar and whip until creamy, ensuring that the entire mixture is incorporated (especially from bottom and sides of bowl). Add the condensed milk, strawberry puree, orange zest and lemon juice and whip until the desired volume has been reached.
4. Spread half of the cream onto the crumb base. Top with the strawberry mixture and cover with the remaining cream. Allow to chill for approx. 4 hours.
5. For the topping: heat the strawberry puree with the sugar, add the soaked gelatin and stir until the gelatin has melted. Top with the jelly and decorate.
